

# **Honda Trading Corporation's Environmental Policy**

## **Basic Philosophy**

**We at Honda Trading Corporation recognize that conservation of the global environment is a vital issue. As a responsible member of society, we will strive to actively contribute to maintaining the health of people and preserving the global environment through all of our corporate activities and take action to achieve the goal of contributing to the sustainable growth of society.**

## **Basic Policy**

**In globally promoting activities as a trading company, Honda Trading shall comply with the following policies with the aim of promoting business activities in consideration of their environmental impact.**

- 1. We will assess the environmental impact of our activities, products, and services and set and implement objectives and goals for key items as environmental improvement items in order to make continuous improvement and prevent pollution.**
- 2. Recognizing that natural resources are finite, we will contribute to controlling global warming and forming a sustainable society through active promotion of environmentally friendly business in addition to conserving energy and resources and reducing waste in our offices.**
- 3. We will continue to work for environmental conservation by complying with applicable laws and other relevant requirements with regard to our activities, products, and services that impact the environment.**
- 4. We will increase and encourage our associates' understanding of environmental information through in-house environmental education and promotion activities in order to raise their awareness of the need for taking actions to raise environmental protection.**
- 5. We will actively participate in environmental activities in order to live in harmony with society.**

**Revised in June 2016**
